How to make a flower crown

You will need:

Coloured paper/ thin card

Pens

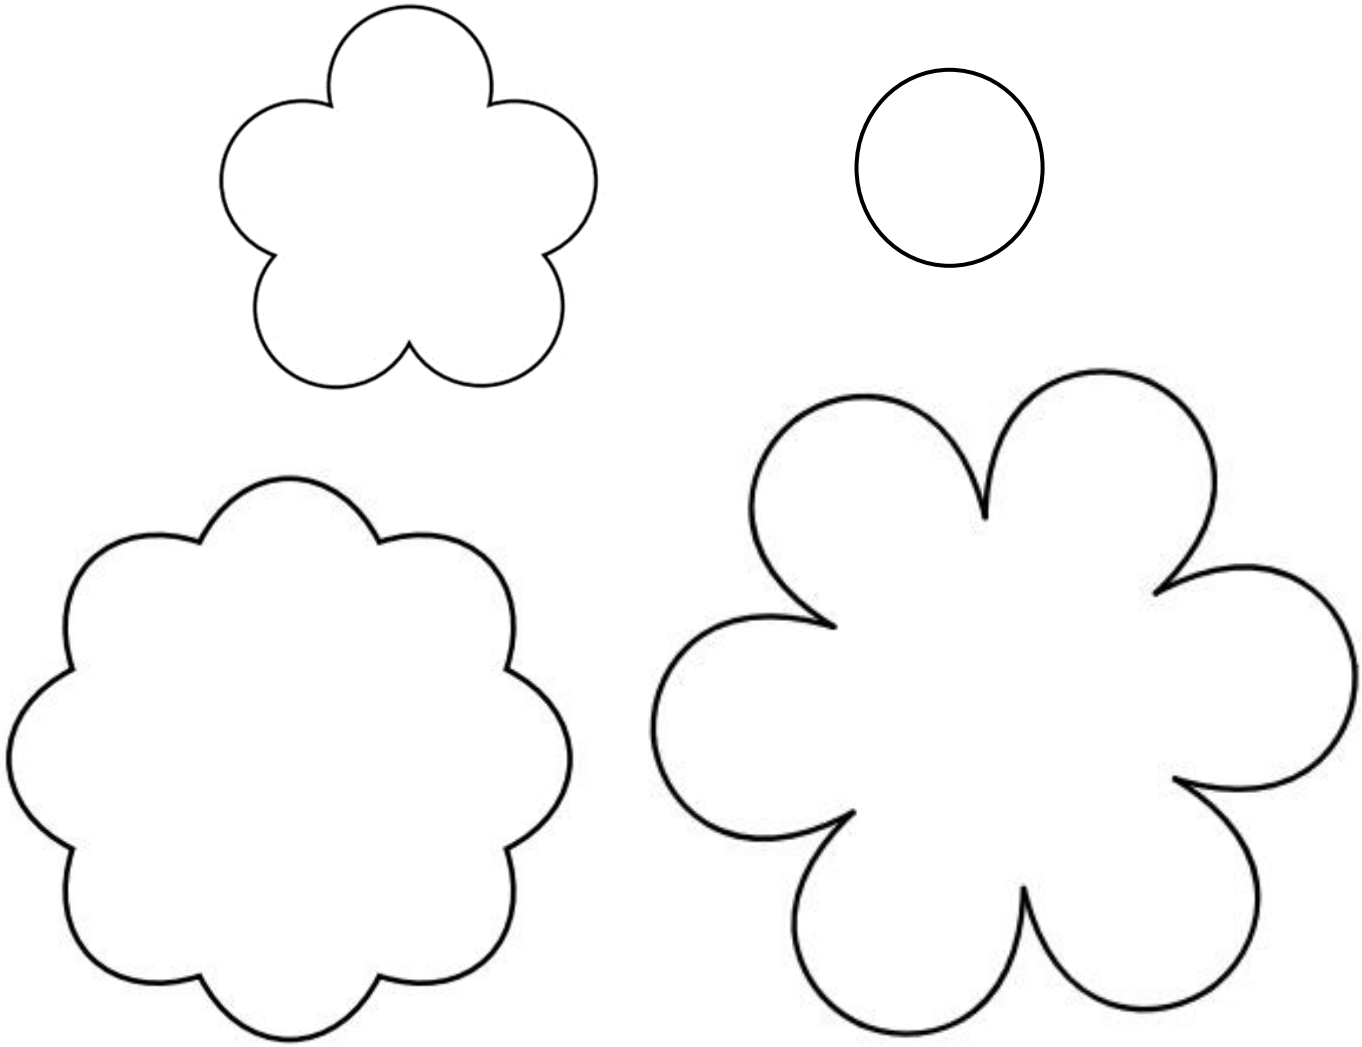
Glue

Scissors

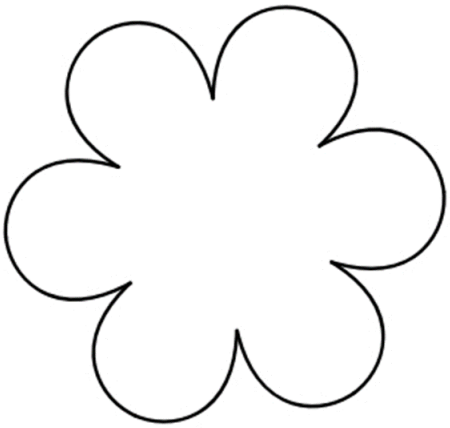
Tape

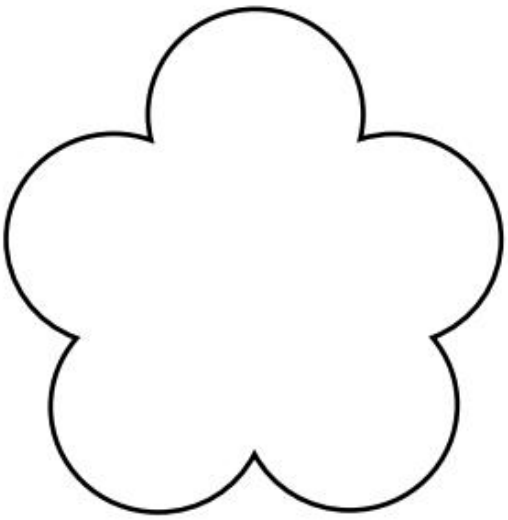
Instructions:

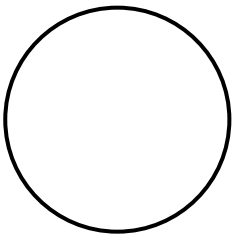
1. Cut two long strips from the thin card, approx. 3cm wide to form the headband. Tape or glue them together. You will adjust the length to fit the size of your/ child's head when you have finished decorating it.
2. Cut out flowers to stick onto the headband. You can use the templates below or design your own. You can layer up flowers and cut leaf shapes too.
3. Glue your flower creations to your headband.
4. Wrap the finished design around your/ child's head to measure and then secure with some tape or glue.

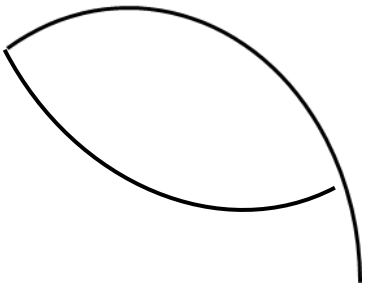


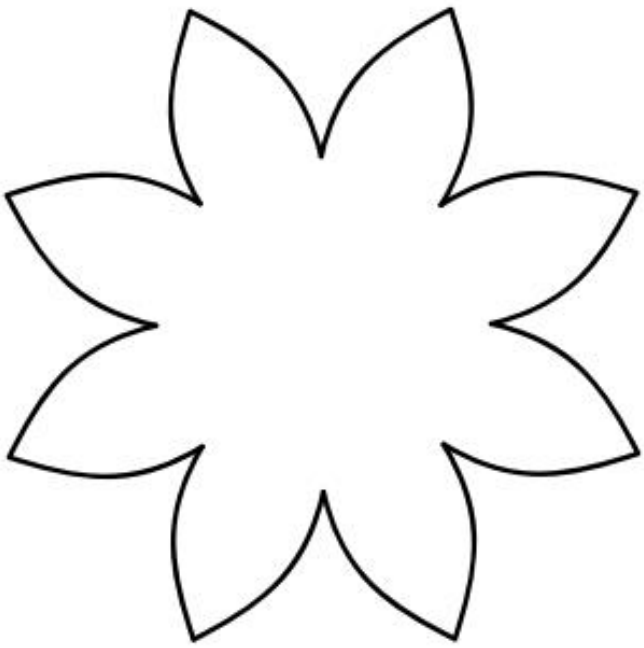
Alternatives:

If you don’t have some of the materials listed above, there are lots of different ways to make the flowers. You could paint recycled egg cartons, use cereal boxes for the card to draw flowers on and colour them in and tissue paper can be scrunched up and stuck on too.










Pipe cleaners also make good headbands instead of strips of paper.
