

**Staying safe online:**

The NSPCC has created some guidance about staying safe online – <https://www.net-aware.org.uk/tips-and-advice/>

Please be advised for children and young people:

- Not to submit material that uses or discloses their full name
- Not to film things that might reveal their exact address, school or somewhere they go regularly
- Not to film anyone else under the age of 18
- To wear appropriate clothing
- To keep themselves safe – i.e. not to share content that feels too personal, complicated or sad.

If the RSC choose to share your work that has been submitted online, we will:

- Gain consent from the parent/guardian for their child to participate in any project that involves the child submitting photos or video content
- Share the final edits with the young people and their parents/guardians before sharing more widely.
- Not use any child's surname in photography or video content.
